Male Virility

Flower Essence + Cell Salt Homeopathic Remedy – Sugar, Dairy, Alcohol & Gluten Free

Dull Sexual Desire - Diminished Sexual Power Weak & Tired

- By releasing toxicity in the pelvic area and removing emotional blockages relating to sexuality, Male Virility sets the stage for optimal sexual function and restoration of youthful vigor.
- For men who want to be “grounded” and “centered.”
- It helps men settle into the male form and be comfortable with being men during all stages of life.
- Male Virility specifically addresses tension and stress in the pelvic region. This is not just for men with sexual functioning issues, it is for all men who want better sex. This remedy also improves Taoist and Tantric sexual practices and makes them more available and natural.
- The effectiveness of Male Virility **increases** with usage and time. Its potency builds with repeated use. This is in contrast to other products which have short-term results because they push the body to do something that it does not have the resources to do. As soon as such products are no longer consumed, the person's body reverts back to its previous state.

How Siddha Homeopathics work:

- Siddha Flower essences and cell salts are captured in the medium of water using traditional homeopathic techniques. The ingredients have been shown to resolve various forms of stress.
- Western medicine and herbs treat the chemical portion of the nervous system. In Eastern traditions, electrical messaging within the body is viewed as more important. Siddha Homeopathics work at this electrical level of the nervous system.
- Electromagnetic blockages can be understood as minute interference waves that prevent smooth electrical transmission within the nervous system. The result is a basic hindrance to well-being from within multiple systems.
- When Siddha remedies are introduced into the body, the nervous system is exposed to a combination of homeopathic ingredients and cell salts. Together, they initiate resolution for the obstructed field, ease electrical transmission and reduce detrimental interference.
